

PICK-UP SUCTION AND CLEANING EQUIPMENT

PICK-UP 6 - PICK-UP 8 - PICK-UP 12

PICK-UP suction and cleaning equipment comes in three versions defined by the waste collection tank capacity, which can be 600, 800 or 1200 litres depending on the model.

The metal parts are hot-galvanised to prevent corrosion, and the clean water tanks are made of polyethylene, which ensures a long life for the whole unit.

The high-pressure cleaning equipment includes a lance gun with pressure regulation, hose, fine steel spooler and 9.5 kW / 13 PS petrol engine, with electric start included.

Activated carbon filter to remove the bad smells from the waste water tank as this is absorbed.

Hose with great breaking strength and self-recuperating when stretched. Approximate total length roughly 18.3 metres, fitted with an easily-activated ball valve.

Technical information on standard equipment by model

PICK-UP 6

PICK-UP 8

PICK-UP 12

	PICK-UP 6	PICK-UP 8	PICK-UP 12
Galvanised steel waste water tank	600 litres	800 litres	1250 litres
Polyethylene clean water tank	1 x 200 litres	1 x 200 litres	2 x 450 litres
Petrol engine with manual and electric start	6.6 KW / 9 PS (only if high pressure cleaning not fitted)		
MEC2000P vacuum pump power	2,700 litres per hour		
High pressure cleaning system including lance nozzle, hose, fine steel spooler and 9.5 KW / 13 PS petrol engine, including electric start system	Included		
Sizes: length x width x height (in mm)	1500 x 1350 x 1350	1500 x 1350 x 1350	1995 x 2140 x 1750
Total weight empty	400 kilos	420 kilos	600 kilos
Suction hose	18.3 metres		
Interior and exterior galvanised waste water tank	Included		
Galvanised frame and base of stackers	Included		
Oil spray separator with oil outlet	Included		
Safety valves for overpressure and depression	Included		
Suction hose (NW 50 x 9.1 m) with suction tube (NW 50 x 0.80 m) and ball valve	Included		
Discharge hose (NW 75 x 2.4 m)	Included		
Cab stop, tank and engine side, extendible	not possible		included
Conformity with European standard	EC
