

PJN3

Sanitation units with recirculation and integrated washbasin. These units are specially conceived for meeting professional needs: industry, building, farming... or for any kind of large-scale event: popular festivals, competitions, gardens... They have plenty of space inside, up to 17% more than other similar products on the market, and also provide integrated washbasins to facilitate hygiene at work.

Advantages for the user:

- Large-opening tank system to make cleaning this easier.
- Anti-splash system in the WC.
- Brighter through double translucent roof.
- Includes washbasin, interior lock and mirror in the door.
- Door with double automatic locking system.

Technical characteristics:

- WC tank recirculation system with foot pump.
- Very tough for building sites or farming.
- Washbasin with separate foot pump.
- Very strong door.
- Ventilation system.
