

HOT FLAKES

Anti-freeze in flake form

Hot Flakes is a flake-form anti-freeze, developed for using in tanks for collecting faecal waste fitted in ecological portable sanitation units. By applying this in the proportions stated you can prevent water and waste collected in tanks from freezing. This product is designed to prevent liquids from freezing. It will not thaw out already frozen liquids under any circumstances.

Usage

After cleaning the sanitation unit, 20 litres of cool clean water should be poured into the tank and Hot Flakes anti-freeze product mixed with this in the amounts recommended according to the minimum temperature envisaged. The product is compatible with King Ultra Power Biodegradable.

It must be dissolved in cold water (under 27°C) and NEVER in hot water.

Amount for application per 20 L. of water depending on minimum temperature envisaged.

Temperature °C	0°	-5°C	-10°C	-15°C
Amount of product	250 g.	500 g.	750 g.	1000 g.

CAUTION: KEEP OUT OF CHILDREN'S REACH.

Avoid contact with the skin and eyes. If this occurs, immediately wash out with plenty of cold water. If the irritation goes on, get medical treatment. Harmful through ingestion. Avoid contaminating foodstuffs.
