

FOAM HAND SOAP DISPENSER

The Foam Hand soap dispenser has a storage capacity doubling the duration of the product in service for customers (dispensing 0.75 ml per service). The foam is spread in the most effective way eliminating a greater number of germs. The operating lever complies with ADA (American with Disabilities Act) by requiring a single hand and a pressure under 2.27 kilograms for dispensing the product.

A long window means the level of soap in the dispenser can be checked at a glance.

Usage

Fill with soap and simply press the button to get the amount required.

CAUTION: KEEP OUT OF CHILDREN'S REACH.
